

Revit MEP Advanced

Course | 1 days *

Class Hours | 8:30am - 4:30pm

Autodesk Revit MEP Advanced will help you to expand your knowledge and use of the advanced features this application offers. Understanding how families are created, edited and modified and how to optimize the project templates are two areas where a student can expand on the benefits of Revit MEP. This course covers creating hosted and non-hosted families, a review of using third-party content, creating custom annotation entities and air terminal tags, as well as best practices and tips on templates.

Prerequisites: Basic knowledge of Windows Operating System, Revit MEP Fundamentals or a fundamental understanding of Revit MEP.
